Oklahoma Newborn Hearing Program

Using Hospital EHDl data to impact change for families!

EHDl Conference
Monday, March 4, 2019

OKLAHOMA STATE DEPARTMENT OF HEALTH · CREATING A STATE OF HEALTH · WWW.HEALTH.OK.GOV

Acknowledgement of Funding

This project is supported by:

- Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) under grant number H61MC00043, *Universal Newborn Hearing Screening*
- Central for Disease Control and Prevention (CDC) of HHS under the Cooperative Agreement NUR3DD000065, *Oklahoma Documentation and Use of Follow-up Diagnostic and Intervention Services Data through the Maintenance and Enhancement of the Early Hearing Detection and Intervention Information System*

This information, content and conclusions are those of the authors and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, CDC, HHS or the U.S. Government.

OKLAHOMA STATE DEPARTMENT OF HEALTH · CREATING A STATE OF HEALTH · WWW.HEALTH.OK.GOV

Learning Objectives

At the end of this presentation, participants will be able to:

- Identify ways to track and integrate hospital hearing screening data within EHDl
- Learn how to maximize EHDl Hospital Hearing Screening Reports
- Learn ways to enhance partnerships with hospitals and outsourced vendors

OKLAHOMA STATE DEPARTMENT OF HEALTH · CREATING A STATE OF HEALTH · WWW.HEALTH.OK.GOV

Oklahoma NHSP History

Year	Milestone
1982	Law Risk Registry
1983	Implementation of NHSP (Risk Registry)
1997	Funding for Physiologic Screening
2000	Development of Taskforce: Audiology, Early Intervention, and Screening
2002	Law Physiologic + Risk Registry
2009	Hearing Screening ALL hospitals
2009	Revised OK Audiology Taskforce
2013	Launched Hospital Hearing Reports

OKLAHOMA STATE DEPARTMENT OF HEALTH · CREATING A STATE OF HEALTH · WWW.HEALTH.OK.GOV

Hospital Hearing Reports

History of Hospital Hearing Reports

- Prior to launching Hospital Hearing Reports, informal surveys were completed
 - Hospitals asked if they were SCREENING all infants at their hospitals per state mandate
 - Hospitals asked if they were REPORTING all infants at their hospitals per state mandate
 - ALL HOSPITAL SAID "YES OF COURSE"
- However OK NHSP knew that wasn't true
 - Children not being screened prior to discharge
 - NHSP had to contact hospitals for missing and conflicting results on regular basis

OKLAHOMA STATE DEPARTMENT OF HEALTH · CREATING A STATE OF HEALTH · WWW.HEALTH.OK.GOV

Hospital Hearing Reports

History of Hearing Reports

- Tried Hearing Reports with 3 individual hospitals
 - Partnership to determine if screening all infants born at each location and reporting all hearing results to NHSP
 - Completed several Quality Improvement cycles to develop currently utilized report format
- Launched Reports in June 2013
 - Retrospective data 2011-2012
 - Individualized Hospital Specific Reports
 - Not Performed, Not Reported, Refer Rates

OKLAHOMA STATE DEPARTMENT OF HEALTH · CREATING A STATE OF HEALTH · WWW.HEALTH.OK.GOV

Hospital Hearing Reports

History of Hearing Reports

- Since Launch (Accomplishments)
 - More than 3x correspondences with hospitals
 - Provided communication, troubleshooting tips, and coaching for hospitals with high rates
 - Completed several individual hospital Quality Improvement projects
 - Noted that hospitals have taken more "ownership for data"
 - Experienced significant improvement in all 3 hospital report areas
 - Increase level of expectations which in turns helps infants and families

Concern Categories

** National Average – 2-4% Refer Rate **

2011-2013 Refer Concern Rates				
No	Low	Medium	High	Extremely High
2.0 - 5.99%	0.0 - 1.99%	6.0 - 9.99%	10.0 - 14.99%	≥15%

2014-2017 Refer Concern Rates			
No	Low	Medium	High
1.0 - 5.99%	0-0.99%, 6.0-7.99%	8.0 - 9.99%	≥10%

2018 Refer Concern Rates			
No	Low	Medium	High
1.0 - 4.99%	0-0.99%, 5.0-6.99%	7.0 - 8.99%	≥9%

Concern Categories

2011-2013 Not Performed/Reported Concern Rates			
No	Low	Medium	High
0% - 4.99%	5.00% - 9.99%	10.00% - 19.99%	≥20.00%

2013-2017 Not Performed/Reported Concern Rates			
No	Low	Medium	High
0.0 - 0.99%	1.0 - 1.99%	2.0 - 3.99%	≥4.0%

2018 Not Performed & Not Reported Rate			
No	Low	Medium	High
0.0 - 0.99%	1.0 - 1.99%	2.0 - 2.99%	≥3.0%

Report Distribution

All hospital reports come out 1 quarter AFTER a quarter has been completed.

- Allows for hearing screenings of infants in the NICU as well as statewide data analysis.

Months Covered	Distribution	Report Type
Jan – Dec 2017	April 2018	2017 Annual (All Quarters)
Jan – March 2018	July 2018	2018 Quarter 1
April – June 2018	October 2018	2018 Quarter 2
July – Sept 2018	January 2019	2018 Quarter 3

Report Description Page

Oklahoma Newborn Hearing Screening Program 2016 Annual Report for Hospital A

Please find attached the 2016 Annual Report for your hospital(s) from the Oklahoma Newborn Hearing Screening Program (NHSP). This report includes (monthly and summary):

- Refer (Not Pass) Rate
- Not Performed Rate
- Not Reported Rate

One goal of universal newborn hearing screening is to ensure that all infants are screened for hearing at birth and receive appropriate follow-up. Therefore, one purpose of this annual report is to assist your hospital and the NHSP in tracking program performance for quality assurance purposes. Data presented reflects information received to date.

Upon receipt of this report, if you have any questions please do not hesitate to contact our program.

Refer (Not Pass) Rate
According to Automated Auditory Brainstem Response (AABR) manufacturers, 2-3% is the average rate for refers (babies who did not pass the hearing screening). All babies that "refer" need additional testing to determine if hearing loss is present. A high Refer Rate may be indicative of improper screening techniques (electrode placement, noisy child/environment, etc) or having equipment that is not calibrated annually.

Not Performed Rate
Oklahoma mandate requires that all babies have their hearing screened. There are several reasons why screening is not performed:

- Babies were discharged early
- Oversight by screeners

Not Reported Rate
State mandate indicates that all hearing screening need to be reported to the Oklahoma newborn hearing screening program. There are several reasons why the hearing tests were not reported:

- Babies still in NICU
- Loss documentation (did not send result)
- Oversight by screeners
- Did not mark bloodspot filter paper

The rates are based on the month if was requested and not the month of birth.

Quarterly vs. Annual Reports

Quarterly Report Letter

Dear Hospital A and Family Unit:

As a member of the Oklahoma Perinatal Reporting Program (OPRR) you will be submitting hospital condition reports for all Oklahoma birthing hospital each quarter. This report is a collaboration with Centers for Disease Control and Prevention (CDC) Cooperative Agreement. Attached is your quarterly report for Quarter 1 2016. Description for all items reported are included. These reports will be provided approximately 3-4 weeks after a quarter has ended due to review cycle in HCC's plan, report appear for this but has not been reported, and data received.

- Refer Report:** Your hospital Quarter 1 Refer rate is 3.02%.
 - The Q1 rate is within the ABR manufacturer and JCH recommendations of an average of 2.5%.
 - The 2016 Average Refer Rate for Oklahoma birthing hospitals was 4.54%.
- Not Performed Report:** Your hospital Quarter 1 Not Performed rate is 0.14%.
 - The 2016 Average Not Performed Rate for Oklahoma birthing hospitals was 0.14%.
- Not Reported Report:** Your hospital Quarter 1 Not Reported rate is 0.27%.
 - All children should be reported by your facility. It has been noted that several hospitals have a rate lower than 1%.

The OPRR Program has challenging conditions and we glad to assist you in the next steps. Please let us know if you have any questions. We are grateful for our facilities that report your birthing hospital.

Sincerely,
 Lawrence H. Cook, M.D., M.P.H., CCC-HP, SLS, CPH, ACP
 Director, Oklahoma Perinatal Reporting Program
 Oklahoma State Department of Health
 Lisa M. Schmitt, M.D., M.P.H.

How to Analyze Annual Reports

Review Overall **Annual** Percentages & Concern Levels

To assist your hospital in understanding these reports and making changes in the future as needed, the OK NHSP has compared your 2016 hospital data with all birthing hospitals as well as hospitals with similar birthing populations.

- **Refer Report:** Your hospital 2016 annual average is 73.931 = **7.84%**.
 - **Concern Level: Low**
 - Of all birthing hospitals in 2016, your hospital is ranked **47/51**.
 - The rate is above than the AABR manufacturer and JCIH recommendations of an average of 2-4%.
- **Not Performed Report:** Your hospital 2016 annual average is 22.931 = **2.36%**.
 - **Concern Level: Medium**
 - Of all birthing hospitals in 2016, your hospital is ranked **44/51**.
 - Though these rankings may seem high, it is due to the fact that most hospitals are reporting or have a less than 1% average.
- **Not Reported Report:** Your hospital 2016 annual average is 23.931 = **2.47%**.
 - **Concern Level: Medium**
 - Of all birthing hospitals in 2016, your hospital is ranked **26/51**.
 - All children should be reported by your facility. Your hospital rate is similar to some of the hospitals of your size. Several hospitals have a rate lower than 1%.

CUMULATIVE	481	20	95.84%	4.16%

NOTE: AABR Manufacturers indicate an average refer rate of 2-5%.

Tips for Reducing Refer Rates

- **Make sure equipment is working properly**
 - Equipment checks
 - Required annual calibration
 - Have back-up cables on hand
- **Ensure good quality hearing screenings**
 - Know when and how to best screen
 - Proper baby selection
 - Properly prepare for screen
- **Complete troubleshooting**
 - Know potential problems during screening
 - Natus Technical support (free)
- **Request a training from OSDH NHSP Staff (as needed)**

OKLAHOMA STATE DEPARTMENT OF HEALTH - CREATING A STATE OF HEALTH - WWW.HEALTH.OK.GOV

Tips to Ensure ALL Babies are Screened

- **Develop Systems & Processes to ensure all infants are screened prior to discharge**
 - Review hospital processes with management and screening personnel
 - Develop Quality Assurance measures to ensure all babies are screened and results are reported
 - Partner with hospital laboratory regarding transfer of bloodspot filter papers
- **Make sure equipment is working properly**
 - Equipment checks
 - Required annual calibration
 - Have back-up cables on hand

Tips to Ensure ALL Babies are Screened

- **Track supplies to ensure no lapses in screening**
 - Supplies are to be purchased by the hospital
 - Know the time needed for hospital procurement
 - Hold back a box of supplies in management office
- **Share hospital's Not Performed reports each quarter**
 - Staff Meetings
 - Nurse's Station
- **Remind staff about State Law for screening**
- **Request a training from OSDH NHSP Staff (as needed)**

Comparing Annual Reports 2017 Not Performed Reports 2017

No	Low	Medium	High
0.0 - 0.99%	1.0 - 1.99%	2.0 - 3.99%	≥4.0%

How to Analyze Annual Reports

Not Reported Reports

Not Reported Rate

State mandate indicates that all hearing screenings need to be reported to the Oklahoma Newborn Hearing Screening Program. There are several reasons why the hearing tests were not reported:

- Babies still in NICU
- Loss documentation (did not send result)
- Oversight by screeners

The rates are based on the month it was requested and not the month of birth

Not Performed vs. Not Reported

Rule of Thumb

"Not Performed"

- ✓ Baby is no longer in hospital
- ✓ Baby was not screened
- ✓ Thus no results available

"Not Reported"

- ✓ Baby was screened
- ✓ No results sent to NHSP

Not Reported Requests

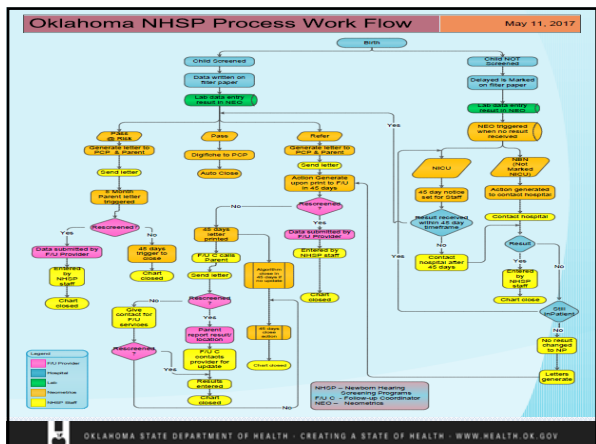

NHSP requests both missing & conflicting hearing results

"Missing"

- ✓ Hearing results not sent via bloodspot filter
- ✓ Subsequent hearing results not sent via fax or email after bloodspot filter left facility

"Conflicting"

- ✓ Ex. Marked both "Pass" and "Refer"
- ✓ Ex. Missing results for one ear

Wellborn Nursery

- If **no** hearing results are received within **1 week of life**, the NHSP will request missing information
- If hearing results are conflicting, the NHSP will request updates
- If child's RISK was NOT marked as "Infant placed in a Level II or III nursery for more than 24 hours," then child is considered in this category unless otherwise noted by staff.

NICU Nursery

- To allow for hearing screenings of infants in the NICU, requests are delayed by 45 days.
- If results are received by 45 days, no request is made.
- If **no** hearing results are received within 45 days week of life, the NHSP will request missing information
 - If child still in NICU, request will be extended & not information on Not Reported reports

Not Reported Requests

- Request sent to ensure compliance with state mandates & to assist with follow-up case management (as needed)
- Requests are sent to birthing hospitals on Thursdays (except for vendor sites)
- NHSP requests a response within **1 week of notification**
- Requests are made to the hospital contact provided to NHSP
 - Additional providers may be added

Not Reported Requests

- Requests sent to individual hospitals weekly via email:
 - ✓ Hospital Name
 - ✓ Number of Requests
 - ✓ Date Sent
 - ✓ Deadline Date
 - ✓ Child's Name, DOB, Medical Record Number, Serial Number (Filter Paper), Mom's Name
 - ✓ Reason for requests

Not Reported Requests

YOUR RESPONSE IS APPRECIATED ON OR BEFORE WEDNESDAY OR NEXT WEEK (1/10/17)

The Oklahoma Newborn Hearing Screening program noted that more information is needed from your site prior to sending parent and PCP letters. This request is to ensure your hospital is in compliance with state law for hearing screening and reporting.

Special note: Beginning January 1, 2016, we will be including risk factors in our missing information requests.

If you notice a child is in the NICU but marked NBN, feel free to let me know. I would be glad to add the risk factor and adjust our requests which trigger in our system at 45 days if no hearing screening is completed. If I am advised by parents or follow-up care providers of a risk not initially marked, I will be adding those to the weekly hospital requests.

Please let us know if you would like someone from our program to work with the hospital staff in regards to marking risk factors since those results are required and they also provide different case management actions/letters for parents and providers.

Please provide updates on the following (see yellow highlighted section) either via email or fax 800.271.6801

Hospital	NICU	Unit	Last Name	First Name	DOB	Medical Record #	Serial #	Room	Results	Date	Notes

Tips to Ensure ALL Results are Reported

- **Complete Hearing Screenings Prior to Bloodspot**
 - Hearing Screenings can occur as early as 6 hours of life
 - Bloodspot taken at 24 hours + 1 minute
- **Enter Results on the Bloodspot Filter Paper**
 - Make sure to mark both Right and Left ear Results
 - Make sure to transfer results if bloodspot is redone
- **Make Corrections Properly**
 - If there are conflicting results, a request will be made
- **Check the size of your "x" on the filter**
 - If the marking touches multiple boxes, our laboratory is not able to "guess" or "assume" results
- **Check bloodspot before sending filter to Lab**

Tips to Ensure ALL Results are Reported

- **Know ways of reporting screened later than 48 hours**
 - Fax 405-271-4892
 - Email to the NHSP: PatriciaAB@health.ok.gov
 - Mail to 1000 NE 10th Street, Room 709, OKC, OK 73117
- **Share hospital's Not Reported reports each quarter**
- **Remind staff about State Law for reporting all results**
- **Request a training from OSDH NHSP Staff (as needed)**

Comparing Annual Reports

2017 Not Reported Reports 2017

- State Average: 1.75%
- 17 hospitals NO concerns (34%)
- 32 hospitals NO or LOW concern (63%)
 - Compared to 2016 – 39%
- 842 babies not reported
 - Approximately half of not reported were due to conflicting results

No	Low	Medium	High
0.0 - 0.99%	1.0 - 1.99%	2.0 - 3.99%	>4.0%

2017 Hearing Reports

Distributed in April 2018

- 48,189 Oklahoma births
- **Refer Rates** –

QI Projects/Trend Analysis

YEAR	Total Birth Rate	Refer Ranking	# of Hospitals	Refers	Average Refer Rate
2011	933	10	27	25	2.72%
2012	1028	13	60	23	2.24%
2013	1000	18	37	34	3.40%
2014	991	40	36	76	7.67%
2015	1026	44	34	87	8.48%
2016	949	32	31	65	6.96%
2017	904	47	31	77	8.52%

Details:

- AABR manufacturers and JCIH recommendations of an average of 2-4%.
- Oklahoma 2017 Annual Refer Rate: 4.74%
- Increased Refer Rates can indicate poor screening, equipment issues, etc.

Hospital Specific Refer Rate

Statewide Refer Ranking

Summary:

- Refer Rates have risen with inconsistencies year to year
- Refer (not passed) ranking has shifted from the Top 10 in the state to the Bottom 10 in the state
- Hospital met state Refer standards 3 of 7 years
- Hospital did not meet state standards 4 of 7 years

CONGRATULATIONS TO 10 HOSPITALS NO CONCERNS IN 2017

- Each hospital ONLY receives their information
- However, NHSP is partnering with OSDH Newborn Screening Program “Every Baby Counts” website to launch Transparent Hearing Reports
- Webinars began in 2017 to:
 - Share the statewide data
 - Provide tips on improvement
 - Congratulate sites meeting “state standards” (No Concern on all 3 reports...screen and report all babies with appropriate Refer Rates)

Tips to Improvement

- **Monitor data along the way**
 - Daily: Within facility, individual children
 - Weekly: Requested Results Emails
 - Monthly/Quarterly & Annually: NHSP Reports
- **Look for Spikes in data and quickly adjust**
 - Try to pinpoint causes of data change (good & bad)
- **Seek assistance from NHSP**
 - Phone call/emails to review data
 - Quality Improvement projects
 - Request a training from OSDH NHSP Staff (as needed)

How does Hospital EHDI data impact change for families?

OKLAHOMA STATE DEPARTMENT OF HEALTH · CREATING A STATE OF HEALTH · WWW.HEALTH.OK.GOV

How has OK NHSP Hospital Hearing Reports impacted change for Oklahoma families

- Within the last 5 years (2013-2018), OK NHSP Hospital Hearing Reports have impacted:
 - 250,000 infants born
 - 50+ Oklahoma birthing hospitals
- Reports helped the OK NHSP provide targeted education/troubleshooting for individual hospitals and/or outsourced vendors
- Reports identified top performers who were able to provide feedback on running quality hearing programs
- Hospital reports have improved the quality of care at hospitals regarding hearing screenings
 - Consistent quality screening

OKLAHOMA STATE DEPARTMENT OF HEALTH · CREATING A STATE OF HEALTH · WWW.HEALTH.OK.GOV

How has OK NHSP Hospital Hearing Reports impacted change for Oklahoma families

- Ensuring screening prior to discharge assists with early identification of hearing loss
 - Ex. Each year, several children in OK diagnosed with hearing loss within 1 week of life
- Proper reporting ensures timely and accurate correspondences/case management/follow-up with parents and PCP/Medical Home Providers
- High Refer Rates burden follow-up clinics and reduces the availability of timely appointments
- Low Refer Rates reduces parent/caregiver stress
- Early identification of hearing loss and early intervention placement gives children more options and maximizes on development synchrony

How OK NHSP Hospital Hearing Reports continue to impact change for Oklahoma families

- Lower Not Performed/Refer Rates
- Track fewer children (ones needing follow-up) through EHDI 1-3-6 Process
- Allows EHDI staff more time to talk with families about follow-up needs
- Reduces # of children going to audiology thus able to obtain appointment in more timely manner
- Allows EHDI to partner with audiology to connect with EI services as needed
- Allows time for new partnerships with Parent to Parent Support and Deaf Mentors
