EHDI PALS

National EHDI Conference 2024

Randi Winston-Gerson, AuD,
NCHAM Program Manager

Mission Statement

EHDI-PALS is a web-based searchable national directory. It helps families, healthcare professionals, and state public health organizations find pediatric audiology expertise for children ages birth to five. The website provides information about childhood hearing to support families and professionals through the process of screening, diagnosis, and intervention.

Advisory Committee Organizations

- The American Academy of Audiology (AAA)
- The American Speech-Language-Hearing Association (ASHA)
- Centers for Disease Control & Prevention (CDC)
- Directors of Speech and Hearing Programs in State Health and Welfare Agencies (DSHPSHWA)
- Early Childhood Technical Assistance (ECTA) Center
- Hands & Voices
- Health Resources and Services Administration (HRSA)
- Joint Committee on Infant Hearing (JCIH)
- National Center for Hearing Assessment and Management (NCHAM)
- Regional Resource Center Program, Mid-South
- State Early Hearing Detection and Intervention (EHDI) Coordinators
- Pediatric audiologists from:
Boys Town National Research Hospital, Indiana University School of Medicine, Rehabilitation Services, Northside Hospital, Atlanta GA, University of Colorado, Department of Speech and Hearing Sciences, University of Miami
University of North Carolina, School of Medicine

Updates/Enhancements

Past years updates

- Facility survey improvements
- Family resources
- Professional resources for audiologists
- Outpatient screening facility listings
- Website layout optimization for phones and tablets
- Look and feel of facility comparison pages

Updates in progress

- EHDI Approved functionality
- State program screening facility data entry

EHDI-Approved Functionality

Facilities that have a star next to their profile indicate that the facility's clinical practices have been reviewed by the state Early Hearing Detection and Intervention (EHDI) program and meet best practice guidelines as outlined by the state's pediatric audiology guidelines and the Joint Committee on Infant Hearing (JCIH) 2019 Position Statement.

EHDI-PALS collaborates with state EHDI programs to promote and reinforce best practices.

If you have questions [contact your state EHDI program.](#)

EHDI-Approved Functionality

Statement for Families and professionals

- Facilities that have a star next to their profile indicate that the facility's clinical practices have been reviewed by the state Early Hearing Detection and Intervention (EHDI) program and meet best practice guidelines as outlined by the state's pediatric audiology guidelines and the Joint Committee on Infant hearing (JCIH) 2019 Position Statement.
- EHDI-PALS collaborates with state EHDI programs to promote and reinforce evidence-based practices as outlined by the state and Joint Committee on Infant Hearing 2019 Position Statement.
- If you have questions, contact your state EHDI program ([link to state map and directory](#)).

EHDI-Approved Functionality

Statement for EHDI Programs

- The “EHDI Approved” (EA) feature provides an option for state programs to identify facilities who are meeting the standard of care in their clinical practices as outlined by the Joint Committee on Infant hearing (JCIH) 2019 Position Statement and state guidelines.
- Once assigned, the star is displayed for families and professionals who are searching for services. This is an “in state” feature in that only facilities in a given state can be assigned the EA status. Use of this feature is not mandatory.
- Facilities that have not updated their facility profile within the last year are not eligible for EA status.

EHDI-Approved Functionality

Statement for EHDI Programs (continued)

Recommendations for states using this feature:

- The EHDI program develops eligibility criteria to share with facilities in their state.
- The EHDI program reviews and rates all enrolled clinics in their state prior to displaying those with EA status/assigned stars.
- The EHDI program reviews and updates EA facilities annually. Updates can be made on a case-by-case basis throughout the year

Enrollment period

- EA status is good for one year after which the star will expire and no longer be displayed.
- A reminder email will be emailed to the EHDI Coordinator three months prior to the expiration date to review expiring facilities.

EHDI-Approved Functionality

Statement for Audiology Facilities

- EHDI-PALS gives your state EHDI program the ability to identify and display facilities that are meeting the standard of care in their pediatric audiology clinical practices. Facilities that meet the criteria are eligible to obtain “EHDI-APPROVED” (EA) status. This status will be displayed as a star next to the facility’s profile in the “COMPARE FACILITIES” portion of the search tool.
- Facilities that have not updated their facility profile within the last year are not eligible for EA status.
- If you have questions, about your facility’s status, contact your state EHDI program. Click on the links to find your state EHDI contacts and to review clinical practice guidelines.

Please Note: Some facilities have eligibility requirements. For example, a school clinic may provide services only to school-age children who live in their district. Always call the facility to verify. Before leaving the site, visit our parent resource page for helpful questions you may want to consider asking the audiologists during your visit.

Registered Facilities

Maintaining Updated Facilities

- Annual update request to facility account manager
 - Changes in personnel
 - Update outdated contact info
 - Misplaced login info
- Ongoing efforts to research new contacts
- Emails to the EHDI-Coordinator with outdated facilities

Updating Facilities

Partnering with EHDI Coordinator/Programs

Several states now using EHDI-PALS as the main resource for audiology facilities

- Streamlines efforts to maintain a local directory of updated listings
- Provides access to detailed clinic information
- Provides additional resources for families and professionals
- Access to Spanish portal and resources

Next...

- State analytics data
- Add county information to search

EHDI PALS

The EHDI-PALS directory has information about hearing (audiology) services for children from birth to age five. All of the facilities in this directory report that they have the equipment and expertise to serve children and have licensed audiologists. The directory contains clinic information, including:

- audiology (hearing) services
- languages available
- payment options
- appointment availability

To learn more about childhood hearing loss, please contact your state Early Hearing Detection and Intervention (EHDI) Coordinator.
